Profile

Cybersecurity enthusiast and B.Tech CSE student with hands-on experience in AI, malware sandboxing, and automation. Seeking an entry-level SOC Analyst role to grow expertise in system defense, threat analysis, and real-world security operations within a collaborative team setting.

Technical Skills

- **Languages:** Java, Python, HTML, CSS
- **Security:** Network Security, Threat Modeling, Security Protocols, Incident Reporting, Security Analysis
- **Tools:** Wireshark, SOC Platforms, Vulnerability Assessment, Network Monitoring
- **Dev & Cloud:** Git, Linux CLI, SQL, Google Cloud
- **Frameworks:** Flask, PostgreSQL, STM32, Scripting & Automation (CLI, Python)

Education

- **B.E., Computer Science & Engineering**, The Oxford College of Engineering, Bengaluru
Expected Jan 2026 | GPA: 7.9
- **Class XII (PUC)**, Narayana PU College, Bengaluru
Jul 2022 | 75%
- **Class X (ICSE)**, Lawrence High School, Bengaluru
Feb 2020 | 70%

Projects

- **AI-Powered Air-Gapped Malware Sandboxing System**
Security Research | Python, STM32, AI Apr 2025–Present
 - Built secure air-gapped system to analyze USB-borne malware threats.
 - Integrated STM32 interface for behavior monitoring.
 - Applied AI models for behavior-based malware detection and intelligent responses.
- **QuiPro – AI-Powered Quiz Bot**
Clipboard Assistant | Electron.js, JavaScript, Python, LLaMA Mar 2025
 - Developed clipboard-based quiz assistant in three variants: API overlay, MCQ selector, offline AI.
 - Optimized for constrained test and research environments.
- **Evolv – Location-Based Productivity App**
Context-Aware Reminder System | Flask, HTML, JavaScript Jan 2025
 - Created web app with geolocation-triggered reminders, task manager, budget tracker, and journaling.
 - Built Flask backend and JavaScript frontend with GeoLocation API.

Certifications

- **Google Cybersecurity by Google on Coursera** Dec 2024
Completed 8-course program: Networking, SIEM tools, System Hardening, Risk Management, Linux Security.

Software & Tools

- **OS & IDEs:** Linux CLI, Windows, Visual Studio Code
- **Databases:** PostgreSQL, SQLite
- **Version Control:** Git, GitHub
- **Networking:** Wireshark
- **Automation & Scripting:** Python, Bash
- **AI Tools:** LLaMA Integration, OpenAI APIs

Workshops & Seminars

- Cybersecurity Workshops by Prameel Arjun – Hands-on threat analysis and network defense (NICC Certified)
- TheHackersMeetup (THM), Bengaluru – Active participant in CTFs and cybersecurity tool sessions

Languages

English, Hindi, Telugu, Kannada, Tamil

Interests

Exploring automation tools, AI integration in security workflows, RPG-style gaming, software tinkering.
